1

Mathematics

- When you reflect on your own experiences learning mathematics, what specific memories come to mind?
- Do you remember a time when you really enjoyed mathematics?
- Do you remember a time when you first thought math was hard and you could not do it?

Unit 6 - Getting Ready for the Unit

2

Mathematics

- What are some things that stand out for you from people's remembrances and stories?
- Which ones resonated with you? Which ones surprised you?
- What are some themes that emerged from these experiences?

Unit 6 - Getting Ready for the Unit

3

Mathematics

- Why is it helpful to think about the ways you learned mathematics and how you feel about math?
- What do you want to remember from this exercise when you are planning curriculum to support young children's mathematical development?
